Dear **Stuart**

I hope by now you have recovered from your traumatic experience with us girls. Our nails are beginning to grow back and the shakes have stopped. The mere mention of an exam is a HAZZARD to us and the RISK FACTOR is a definite 16.

You have again managed to pull us through yet another course though. We didn't know how as we can be numpy heads at times.

You explained it all in simple terms and again like the first aid course made it fun. Some people go into the nitty gritty, which you don't really need to know. It only confuses and scares the whotsit out of you. Your matter of fact way and the odd clue to a puzzled face was just what we needed. Thank you.

Don't forget to bring the camera when you come again for our mug shots. We don't need any teaching for that, we can smile all on our own.

I thought you deserved a certificate of your own for putting up with us. I hope you like it. A well and truly deserved one.

blow on to more menial things, I enclose your cheque for Seriously though it really was well worth it and we all thank you for giving us a bit of fun and knowledge both at the same time.

Best wishes to you

Rose
